

## MEF EMC-FILTER 3-PHASE 1-STAGE WITH NEUTRAL

I:20A U:4x440 VAC snap on

Current: 20 A DIN-rail mountable with neutral

Attenuation curves on request.

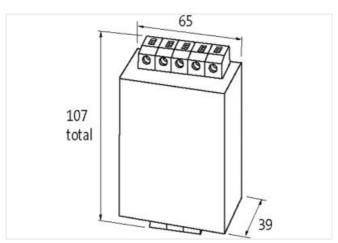

The 3-phase and 1-stage MEF 3/1 line suppression filters are used in the range 0.1...30 MHz to suppress conducted interference on mains and supply lines. They are suitable for TN-S, TN-C-S and TT networks. The best filter effect is achieved with short connecting lines (recommendation: PE connection < 10 cm) with the largest possible cross-sections. The mains suppression filters act bidirectionally (in both directions). They reduce symmetrical and asymmetrical interference, which often occurs in electronically controlled three-phase devices due to mains interference.
